Greetings!

May wrapped up Beef Month, however, every month and day is Beef focused for our producers. As cattle are out to pasture and focus shifts to farming and hay production, things slow down in the office for DNA submission and registrations with our associations. Now is a good time to catch up on herd work and DNA testing while turnaround times are faster than through fall and winter.

On April 13, board President Arba Word graciously hosted the 2024 annual meeting in Higgins, TX. Over 40 Romagnola producers and enthusiasts made the trip and sat in on a lively meeting. Topics covered new board member appointment, DNA, Registration guidelines, seller etiquette and more. We are looking forward to continued conversation and growth in the breed. Official meeting minutes will be available soon with complete details.

Coming this fall, NCBE will be hosting a series of educational webinars open to all producers. Have a topic you want to learn more about? Let us know!

Happy Grazing,
Romagnola & RomAngus Cattle Association

How To

Submitting DNA requests through RRCA

DNA testing through Neogen Genomics is now available through your RRCA membership.

Steps

Order testing supplies through

<https://www.neogen.com/categories/sampling-equipment/>
Collect Samples

Complete animal registration or DNA submission forms found at www.romagnola.net

2024 Stats
Members: 49
Registrations: 88
Transfers: 78

About Us

Home of the complete and original herd book for Romagnola cattle in America, and official registry for Romagnola, RomAngus, and RomMaster cattle in the United States.

Romagnola breeders are committed to producing genetics that will advance your herd and help meet the needs of today's beef industry. Maternal excellence, carcass traits, adaptability, and growth potential are just a few highlights of the breed.

We Want You!

RRCA is currently seeking producers to feature on social media, the website and newsletters! Contact us today to be featured!
